

INSTA-TRADE EXIM LLP

PRODUCT CATALOG 2023

About Us

With the growing years, it has Developed a remarkable Experience in serving the Quality of Medical & Surgical Products. Presently, INSTA'S holds reliable portfolio (or Strong Stock) of 250+ Products served with Love, Care and Quality.

High Quality & Performance Standards are routinely met in the designing & Manufacturing of each Products. Holding the same spirit for each Customer which derives INSTA'S Customer Policy .

History

We had a humble beginning as a company in the year 2025 caring for Human Lives. We at INSTA-TRADE EXIM LLP, aim our efforts in establishing and consolidating ourselves as a Leading Manufacturer of Medical & Surgical Products.

We continue developing special know-how in the design, development, and manufacturing of our product range. The journey to excellence is continuous and we intend to carry forward the meet the requirements of the medical profession.

Our growth approach & aim is to accomplish a Large Customer Network, both Domestic & International, as a result of our directed approach towards customer satisfaction through Quality Product, Competitive Cost & On-Schedule Delivery. Our operations and activities are accredited with an ISO GMP Certification and the majority of our products are CE Marked.

INDEX

1. Urology	1 to 4
2. Infusion & Transfusion	5 to 7
3. Gastroenterology	8 to 8
4. Anaesthesia & Respiratory Care	9 to 14
5. Surgery & Wound Care	15 to 15
6. Miscellaneous Range	16 to 19
7. Orthopedic Range	20 to 21
8. Body Belt & Braces	22 to 23

Foley Balloon Catheter

Optimal Eyes

Smooth, optimal eyes ensuring a traumatic introduction and effective drainage.

Large drainage lumen

For fast and effective drainage
Round channel that minimizes encrustation and clogging.

Pressure resistant balloon

Ultra thin highly elastic balloon
Easily Infated or deflated
for maximum patient safety

Strong drainage funnel

kink resistance and
provides best connection
to drainage bag

Inflation Valve

Choice of Hard or Soft non-return
Valve for trouble free inflation &
deflation of balloon.

Silicone Catheters

Silicone fluid surface results in smooth
Finish for easy passage through the
urethral meatus. Designed for short and
long term urinary drainage.

◆ Silicone Foley Balloon Catheter

- Silicone foley catheter is a thin, Sterile tube inserted into the bladder to drain urine from the body.
- The device is developed using 100% medical grade silicone and have good biological compatibility. Smooth tapered rounded tip of catheter facilitates easy introduction of the device into the urethra.
- The drainage eyes are accurately formed to allow effective drainage.
- The symmetrical balloon expands equally in all directions to execute its function of retaining bladder efficiently. Color coded sleeves are useful for easy size

◆ Urethral Red Rubber Catheter

- Made from natural MR grade PV Latex Rubber.
- Designed for short term urinary drainage in the patients.
- Available with Round, hollow tip with smooth optimal eye.
- URETHRAL RED RUBBER CATHETER is manufactured with integral tapered funnel end.
- E.T.O. Sterile & Pyrogen Free / Individually Packed.

Male External Catheter

- Manufactured from pure latex for soft and gentle feel.
- Penis Sheath/External Catheter, Provided With self.
- Adhesive coated Strip for Proper Fixation on to Penis.
- Proximal end is designed for easy connection to urine bag / leg bag, making it simple to use.
- Individually packed and ready for use.
- E.T.O. Sterile and pyrogen free.
- **Size: Ex-Small (20 mm), Small (25 mm), Medium (30 mm), Large (35 mm),**

Nelaton Catheter

- Manufactured from non- toxic, non- Irritant, Medical grade PVC.
- Frozen surface tubing for super smooth incubation.
- A traumatic, soft, rounded, Closed tip with two lateral eyes for efficient drainage.
- X-ray opaque line Provided throughout the length of catheter & Color Coded Plain Connector for easy identification of Size.
- Universal Funnel Shape Connector for easy connection to urine Bag.
- E.T.O. Sterile & Pyrogen Free / Individually Packed.

Rectal Catheter

- Designed for introduction of enema solution into rectum to release/ aspire rectal fluid.
- Manufactured from soft non toxic , non Irritant.
- Kink resistant medical Grade PVC tube.
- Proximal end is Provided with Funnel shape connector for easy connection to the suction equipment.
- A traumatic, soft, rounded closed tip with two lateral eyes for efficient drainage.
- Color coded plain connector for easy identification of size.
- Available with the option of radio opaque line throughout the length for X- Ray Visualization.
- Sterile / Disposable / Individual Packed.

Urine Pot

- 2 in 1 urine pot for male & female both.
- Easy at cover for hygiene and odorless.
- Easy carry handle.
- Can be stored in standing or lying position
- Disposable & individually packed.
- Sterile / Disposable / Individual Packed.

Urine Collection Bag Regular

- Available with specially design hook facilities for carrying, handling & holding the tube in upright position.
- **Capacity : 2000 ml Approx.**

Urine Collection Bag With Bottom Outlet

- Available with specially design hook facilities for carrying, handling & holding the tube in upright position.
- **Capacity : 2000 ml Approx.**

Urine Collection Bag With Hanger

- Available with hanging & carrying facilities using molded hanger or hanger stick with string.
- **Capacity : 2000 ml Approx.**

Urine Collection Bag For Paediatric

- For Short term urine collection of neonates.
- Provided with hypoallergenic self - adhesive for better grip, prevent irritation and easy removal from skin of the infant.

Urine Collection Bag With Measured Volume Meter

- Designed for accurate measurement of hourly urine out put during examination of patient.
- Completely closed circuit eliminates the risk of contamination.
- Measured volume meter directly attached to urine bag with over flow facility & convenience to empty the measured volume meter in the bag.
- Push / Pull bottom outlet is provided for easy & quick emptying of urine bag.
- **Capacity : 2000 ml. Approx.**

Gibbon's Catheter

- Designed for long term Urine drainage.
- Manufactured from soft non toxic, Non Irritant Kink resistant Medical Grade PVC tube.
- Compatible with Catheter lubrication.
- Provided with X -Ray Opaque line through its length.
- Sterile / Disposable / Individual Packed.

Tur Set

- “ Y “ shaped set design for endoscopic irrigation during trans urethral resection of prostate gland.
- Thumb operated clamps helps quick and change of bottles.
- Proximal end fitted with flexible latex tubing for easy connection to endoscope.

Bed Pan

- Specially designed for collection of urine sample for culture test.
- Made from medical grade Polypropylene.
- Absolutely leak proof.
- Sterile / Disposable.
- Size: 30 ml , 50 ml.

Urine Culture Bottle

- A bedpan is used for both urinary & fecal discharge of bedridden patient.
- Easy fit cover for hygiene and odorless.
- Our bedpan comes in attractive designs made to be more comfortable & Practical than traditional ones.
- It is made from tough, high grade plastic and is ergonomically designed for utmost human comfort, durable for repeated use, easy to clean and store & suitable for children & adults.

I.V. Infusion Set

Micro Drip

AirVent

Y-Connector

General Feature

- Constitute extra strong & sharp spike with Clear, transparent and flexible drip chamber with disc filter facilitates visualization.
- Suitable for administration of Infusion fluid for medical therapy.
- Efficient roller controller for accurate and unrestricted flow.
- Super smooth kink resistant PVC tubing with standard length of 1500 mm for easy visualization of flow.
- Sterile/Disposable/individual Packed.

Options Available

- Air Vented or Non Vented Spike.
- With or Without Needle.
- "Y" Connector (Latex or Latex Free).
- Latex or Latex Free.
- Needle free Y- site.
- Luer lock or Luer slip.
- Flow Regulator Integrated into Infusion Set.
- PVC/DEHP Free Kink Resistant Set.
- With Customized Tube Length more than 1500mm.

I.V. Flow Regulator

- Designed to control the Flow Rate of IV Fluids with Range of 5 to 250 ml/hr manually.
- With "Y" Connectors Injection Site for Extra Medication. Constant Flow Rate.
- E.T.O. Sterile, Non- Toxic & Pyrogen free.

I.V. Intravenous Cannula

- For Infusion of Intravenous Fluids and Medicines.
- Smooth, Sharp needle for easy penetration.
- Flexible wide wings for proper Fixation.
- Injection port for extra medication.
- Transparent flash back chamber to check back flow of blood.
- PTFE/FEP Teflon catheter to minimize trauma to the patient
Color coded by size for easy identification.
- Available with needs of different gauge size.
- Sterile/Disposable/ Individual Blister Packed/ Printed Box Packing.

Three Way Stop Cock

- Designed to incorporate between infusion line and vein puncture device for additional infusion.
- Fully transparent body made of medical grade polycarbonate allows visualization of flow of fluids.
- Available with blue and red pegs for arterial and venous line identification.
- Inside is completely smooth & available with molded luer lock.

Three Way Stop Cock With Extension Line

- Designed to minimize the movement at cannulation site by taking administration site away from the insertion site.
- Fitted with 3 way stop cock at one end & male luer lock for safe and secure connection at the other end.
- Soft, frosted and kink resistant PVC tubing.
- Also available with “Y” injection Port (Latex or Latex Free)
- Sterile / Disposable/individual Packed.
- **Extension tube length : 5-250 cms, I.D. : 3.0 mm and O.D.: 4.1 mm**

High Pressure Monitoring Line

- Designed for arterial blood pressure monitoring.
- Soft, Clear,flexible,100 % Leak proof and no blockage tubing.
- Fitted with male and female luer locks for secure connection.
- Sterile , Non - Toxic ,and pyrogen free.
- Extension Tube : I.D.- 1.5 mm O.D.-3.0 mm
- **Tube Length : 25 -250 Cms**

Low Pressure Extension Line

- Designed to make administration of fluids more convenient and suitable for low pressure applications.
- Fitted with male and female luer locks for secure connection.
- Extension Tube : I.D.- 3.0 mm O.D.-4.1 mm
- **Tube Length : 25 - 250 Cms**

Blood Administration Set

- For transfusion of blood and blood components.
- Clear, transparent and flexible drip chamber facilitates visualization.
- sharp spike for better penetration.
- Specially designed roller clamp for better flow control.
- Superior quality & self sealing latex tubing / latex or latex free flash bulb for easy flushing.
- Super smooth kink resistant PVC tubing with standard length of 150 cms.
- Approx. 200 micron blood filter and 18 G hypodermic needle.
- Approximately 20 drops/ml
- Non- Toxic, Pyrogen free & Sterile by EO.

Available Options

- **Air Vented or Non Vented Spike**
- **With or Without Needle**
- **“Y” Connectors (Latex or Latex Free)**
- **Luer Lock or Luer Slip**
- **DEHP Free**
- **With Customized Tube Length.**

Measured Volume Burette Set

- Suitable for infusion of measured quantities of fluid.
- Clear, soft, cylindrical & calibrated measured volume chamber with marking for precise fluid administration.
- Efficient roller controller for better flow control.
- Soft and kink resistant tube.
- Specially beveled strong & sharp spike for smooth & better penetration.
- Bulb Latex or Tube Latex for easy Flushing.
- Automatic floating shut off valve to prevent air embolism and indicate fluid level.
- Approximately 60 drops/ml Size : 110 ml & 150 ml

Scalp Vein Set

- Designed to provide rapid venous access, for patient comfort during long infusion.
- Siliconized and thin walled high quality imported needle for atraumatic insertion.
- Color coded butterfly shaped wings for easy handling and better fixation.
- Super smooth kink resistant tube.
- Sterile/ Disposable/ Individual blister / Poly pack.

Infant Feeding Tube

- Suitable for neonates and pediatric nutritional feeding.
- Manufactured from non toxic, non irritant PVC to delicate mucosa.
- Distal end is coned with two lateral eyes for efficient drainage.
- Proximal end is fitted with female luer mount for easy connection to feeding funnel or syring
- Low friction tubing & Super smooth tip ensures trauma free insulation.
- Radio- opaque line is provided through out its length for X-ray visualization.
- Sterile/Disposable/Individual Packed.

Ryle's Tube

- Manufactured from non toxic , non irritant PVC.
- Specially designed for nasogastric introduction for nutrition and aspiration of intestinal secretion.
- Distal end is coned with corrosion resistant Plastic balls sealed into the tube ,to assist the passage of the tubing during incubation.
- Four lateral eyes are provided for efficient aspiration and administration.
- The tube is marked at 50cm,60 cm,&70cm from the tip for accurate placement.
- Provided with X-ray opaque line throughout the length.
- Sterile/Disposable/Individual Packed.
- Length: 105 Cms.
- Available with color coded clouser connector for easy identification of size.

Stomach Tube

- Designed for nasogastric introduction of nutrition & aspiration of intestinal secretion.
- Low friction Medical grade PVC reduces the incidences of nasal discharges.
- Radio opaque line through out its length helps checking the position radio logically.
- Proximal end is provided with universal funnel shape connector.
- Marked at 50cm,60cm,70cm from the tip for accurate placement.
- Sterile/Disposable/Individual Packed.

Levin's Tube

- Designed for gastro-intestinal feeding and aspiration of intestinal secretion.
- Low friction Medical grade PVC reduces the incidences of nasal discharges.
- Tube with radio- opaque line, marked at 45,55,65,& 75 cms from the tip for accurate placement.
- Distal end is coned with four lateral eyes for efficient drainage.
- Proximal end is provided with universal funnel shape connector.
- Sterile/Disposable/Individual Packed.
- length : 125 cms.
- **Size: 8 10 12 14 16 18 20**

Endotracheal Tube

- Designed to secure the airway and maintain the gas exchange in the lungs by inserting in to the trachea through the oral / nasal cavity.
- Manufactured from special non toxic , clear, transparent, thermos sensitive siliconized PVC Material to protect delicate mucosa tissues and readily conforms to the body contour.
- Proximal end fitted with standard 15 mm connector.
- Clear PVC tube with X ray detective line & visible markings for easy observation.
- Murphy Eye smoothly formed to allows ventilation in the event of obstruction of the end of the tube during induration.
- Sterile/Disposable/Individual Packed
- **Type: Plain, Cuffed, Reinforced**
- **Size : 2, 2.5, 3, 3.5, 4, 4.5, 5, 5.5, 6, 6.5, 7, 7.5, 8, 8.5, 9, 9.5, 10**

PLAIN

CUFFED

Suction Catheter

- Manufactured from soft Non toxic , Non Irritant medical grade PVC.
- Designed for removal for secretion from mouth, trachea and branchial tubes.
- Frozen surface tubing for smooth insulation.
- Color coded connector for easy size identification.
- Sterile/Disposable/Individual Packed.

Nasal Oxygen Catheter

- Suitable for easy and efficient administration of oxygen via nasopharyngeal route.
- Soft and soomth open distal end with multiple lateral eyes for even dispersion of oxygen.
- Funnel connector at proximal end.
- Color coded by size for easy identifclation.
- Sterile/ Disposable/ Individual Packed.
- Length: 40 cms

Urethral Catheter

- Manufactured from Non toxic , Non Irritant PVC tube.
- Most Suitable for removal of secretion from mouth, trachea & bronchial tubes.
- Proximal end is fitted with (Universal) funnel shape connector for connection to standard suction equipment for accurate placement.
- Funnel Shape connectors are color coded for size identifclation.
- Provided with x-ray opaque line throughout its length.
- Sterile/Disposable/Individual Packed
- **Size: 8 10 12 14 16 18 20**

Oxygen Mask

- Soft, Clear, Large Anatomical Face Mask for patient comfort.
- Adjustment elastic strap and clip for proper positioning of mask.
- Provided with 210 cm long multichannel tube to ensure continuous flow of oxygen even if tube accidentally kinked.
- Proximal end of tube is fitted with soft funnel shape connector for easy connection to oxygen source.

Nebulizer Kit

- Consist of face mask with an specially designed nebulizer chamber for nebulizing patients.
- Nebulizer chamber capacity 5/6/7 cc.
- Swivel connector for convenience of attachment to the oxygen tube.

High Concentration Mask

- High concentration oxygen mask with tubing is intended to supply oxygen or other gases to an individual for oxygen therapy, and the reservoir bag is able to avoid rebreathing.
- Made from non- Toxic medical grade PVC , 100 % Latex free.
- Comes with 1 Ltr Reservoir bag.

Venturi Mask & Single Dial Venturi Mask

- Allow accurate administration of a variety of oxygen concentrations.
- Non - Toxic PVC color coded kit for ease of use and delivery of variable concentrations of oxygen.
- Six color diluters for six concentrations : 24 %, 28%, 31%, 35%, 40%, 50%.
- Adaptor for high humidity.
- Designed for the fixed and accurate administration of a verity of oxygen concentrations to the patients.
- Two Oxygen diluters , one for lower concentration of 24%,26%,28%,30%, (white color) & the other for higher concentration of 35%,40%,50% (Green color) for

CATHETER MOUNT

- Designed for delivery of oxygen or gases to the patient and can be connected with ET tube for respiration.
- Catheter mount 22 mm standard female connector compatible with all breathing and ventilator circuits.
- Specially designed port at the elbow.
- Corrugated tubing manufactured from antistatic EVA.
- E.T.O. Sterile and pyrogen free.

T - OXYGENATOR

- T- Oxygenator helps weaning patient from ventilator. It oxygenates patient on endotracheal tube or tracheostomy tube.
- It allows doctor to assess about removal of endotracheal tube or TT.
- For long term Tracheotomy patient with oxygen requirement this device works well.
- There is suction port by which secretions can be extracted without removal of T

BAINS CIRCUIT

- Bains Circuit offered comprises co- axial modification of basic T- piece system which has been developed for facilitating scavenging of waste aesthetic gases.
- As a tube carrying fresh gas, It travels inside outer reservoir tube to endotracheal tube connector.
- Bains circuit is made from corrugated tube of 22 mm diameter with expiratory valve connecting tube and 2 liter reservoir bag.

VENTILATOR BREATHING CIRCUIT

- Medical Grade Corrugated PVC ventilators tube circuit can be ported for temperature and capnography circuit is provided with a recessed standard 22 mm male/male & 22 mm male/female adaptor for flexibility throughout the critical care management.
- The unique water trapper offers excellent drainage and ideal positioning to maximize moisture collection.
- The circuit uses standard connector that is simple convenience in clinic.
- Sterile/ Disposable / Individual Packed.
- Size: Adult/Pediatric
- With or Without Port.

3 BALL SPIROMETER

- Restores and maintains lung capacity in post operative ambulatory and COPD patients.
- Sustained deep breathing has been shown to relieve anxiety and fight stress.
- Helps to develop, improve and maintain respiratory fitness.
- A transparent, well calibrated chamber with single ball or color coded triple balls allows visual calibration and estimation of the patient's progress.
- Air filter for enhanced protection.

BREATHING FILTER

- Medical filter are used for the removal of bacteria from the air breathed in by the patient from the environment through respiratory support equipment. Such filter in the airway between equipment and patient.
- Breathing filter utilize hydrophobic membrane & synthetic media that provide barrier & electrostatic filtration with bacteria & viral removal efficiency higher than 99.99% accomplished with extremely low resistance to air flow. The HME keeps moisture retention and warming of inhaled air, filter design in different size with

Products Feature:

- Clear housing , Low flow resistance high filtration efficiency, High heat& humidity level,CO2 monitoring port, sterile package.
- Size: Adult / Pediatric.

Type Available.

REBREATHING BAG

- Rebreathing bag made from medical grade latex rubber with 22 mm I.D. Connector.
- **Size: 0.5, 1, 1.5, 2.**
- Available Color:

J R (JACKSON REES) CIRCUIT

- J R Circuit is made from corrugated tube of 22 mm diameter with expiratory valve connecting tube and 2 Liter reservoir bag.

NEBULIZER WITH T PCS

- Nebulizer with T pcs is simple to use.
- It is quick to assemble - facilitates fast nebulisation.
- It is Available with or without mask & can be used with mask. iGel, LMA and ET Tube
- Provided Swivel connector & T Pcs for convenience of attachment to the oxygen tube.
- Available with star lumen 210 cm long multichannel tube to ensure continuous flow of oxygen even if tube is accidentally kinked.
- Proximal end of tube is fitted with soft funnel shape connector for easy connection to oxygen source.

GUEDEL AIRWAY

- Specially designed to maintain an unobstructed oropharyngeal airway during general anaesthesia and in unconscious patients for other reason.
- A traumatic soft- rounded edge.
- Integral color coded hard bite block to prevent biting of tongue and airway occlusion.

TWIN BORE NASAL OXYGEN SET

- Designed for easy and efficient administration of oxygen. manufactured from soft, non-toxic, non irritant PVC even in long term use.
- Soft twin prong nasal tips to ensure equal volume of oxygen to both air passages for maximum patient comfort.
- Smoothly finished & adjustment nasal tips for maximum patient's comfort.
- Star lumen tube ensures the supply of oxygen even if tube is accidentally kinked.
- Soft funnel shaped connector facilitates easy connection to oxygen source.
- Tube length : 200 cms.
- Size: Adult, Pediatric & Neonatal.

NASOPHARYNGEAL AIRWAY

LARYNGEAL MASK AIRWAY

- Size : 6, 7, 8.

AIR CUSHION MASK

- Air filled cushion to provide safety and comfortable use.
- Suitable for use in respiratory care anesthesia & resuscitator.
- Body with antistatic property.
- Good grip.
- Material : Silicon

RESUSCITATION BAG

- Silicon resuscitation bag is available with standard elbow E-type valve, Oxygen Connecting tube and reservoir bag.
- These bags are respiration device used to provide positive pressure for manual ventilation needed when a patient lacks respiratory drive during resuscitation involving oxygen.
- **Size : Adult, Pediatric, Infant.**

VERSAMED VENTILATOR CIRCUIT

NEONATAL HEATED WIRE CIRCUIT

YANKAUER SUCTION SET

- Transparent molded yankaur suction handle attached with 2.5 mtr long non- toxic, medical grade PVC tubing suitable for easy attachment to any type of suction apparatus.
- A port is provided at the distal end of handle for finger tip / thumb control facility during suction management.
- Yankauer handle is open with four lateral eyes to withstand negative pressure and ensure

ABDOMINAL DRAINAGE KIT

- Manufactured from non toxic, non irritant medical grade PVC.
- Intended for the use in post operative drainages from abdominal areas.
- Soft & Smooth abdominal drainage catheter with Radio opaque line, large atraumatic eyes for efficient drainage & collection bag of capacity 2000 ml.
- Specially designed handle holds tube up right Position and facilitates carrying.
- Sterile /Disposable/ Individual Packed.

CHEST DRAINAGE CATHETER

- Suitable for post operative drainage after cardio- thoracic and thoracic surgery.
- Proximal end is fitted with tapered connector for easy and non- traumatic insertion.
- Provided with radio opaque line and marking at every 2 cms from the last eye to ascertain the depth of placement.
- Large smooth drainage eyes for efficient drainage.
- Sterile / Disposable / Individual Packed.

CORRUGATED DRAIN SHEET

- Extra soft super smooth PVC corrugated sheets for wound drainage.
- E.T.O. Sterile and Pyrogen Free

CLOSE WOUND SUCTION UNIT

- For close wound under negative pressure post operatively with option to use one or two catheter simultaneously.
- Available in different sizes with matching size curved needle to meet moderate to heavy drainage needs.
- Units consists of below unit with connector connecting tube with clamp and "Y" connector. Curved needle with matching size catheter, spare perforated redon drain catheter.
- Collapsible bottle is available in 400 ml & 800 ml.

MINI CLOSE WOUND SUCTION UNIT

- Designed for wound drainage under negative pressure for minor surgery and plastic surgery.
- Units consists of bellow container with capacity 80 ml , Curved needle with matching size catheter

LATEX SURGICAL GLOVES PRE POWDERED

- Intended to use in invasive surgery for protective covering for the hands from contamination.
- Made from special quality natural rubber latex.
- Lightly powdered with bio- absorbable corn starch
- USP garde to prevent granulose.
- Anatomically shaped for better comfort and micro rough surface for better instrument grip.
- Offers superior barrier protection , precise dexterity, tactile sensitivity and flexibility.
- Extensively leached in hot flowing to reduce extractable protein and chemical residues.
- Bio burden and sterility tested.
- **Size : 6, 6.5, 7, 7.5, 8, 8.5, 9.**

LATEX SURGICAL GLOVES POWDER FREE

GYNAECOLOGICAL ELBOW LENGTH GLOVES

- Powder free gloves are used to eliminate risk associated with glove powder.
- Powder free latex gloves are chlorinated or coated with unique blend of polymer to provide excellent dry and damp hand donning capabilities.
- Manufactured under Hygiene condition to minimize bio- burden level.
- Sterilized by EO.

EXAMINATION GLOVES

LATEX GLOVES (PREPOWDERED / POLYMER COATED / CHLORINATED)
NITRILE GLOVES / VINYL GLOVES

EXAMINATION NITRILE GLOVES

- Non finger fatigue, keep the hand cool and comfortable.
- Size : Small , Medium, Large, Ex- Large.
- Sterile/ Disposable/ Printed box packing.

EXAMINATION LATEX GLOVES

EXAMINATION VINYL GLOVES

INFANT MUCUS EXTRACTOR

- Specially designed for aspiration of secretion from oropharynx in newly born babies to ensure free aspiration.
- Convenient to extract mucus specimen for micro biological examination.
- Spare plug cap is provided for sealing and storage of specimen.
- Low friction surface catheter is provided with open end silk smooth round tip for trauma free insertion.
- Also available with bacterial barrier filter at suction end.
- **Capacity 20 - 25 ml.**

KARMAN CANNULA

- Specially designed for aseptic medical termination of pregnancy.
- Suitable for use with MTP syringe or Suction apparatus.
- Universal adopter is used for connecting to suction apparatus.
- Distal end is coned with two large lateral eyes to facilitates the curette.
- Sterile/ Disposable / Individual Packed.

UMBILICAL CATHETER

- Manufactured from soft PVC white yield easily to tissue contours at body temperature.
- Designed for intermittent or continuous access to the umbilical artery or vein of newly born or premature infants.
- Tube with radio-opaque line, Marked at every cm from the open distal end to ascertain the depth of placement. Individually straight packed in paper pouch packing to ensure aseptic handling.
- Sterile/ Disposable/ individual Packed.
- Tube length 40cm.

UMBILICAL CORD CLAMP

- Manufactured from non toxic Medical grade polymer.
- Designed for clamping the umbilical cord immediately after birth.
- Provided with security lock click to prevent accidental re- opening.
- Finger grip ensure safe and convenient handling , particularly when gloves are wet.
- Provided with grooves all along the length to prevent the slipping of the Umbilical cord and to retain it in the same position.

BLOOD LANCET

- The blood lancet that we manufactured is individually packed and is sterile.
- The point of the needle is very sharp and allows easy penetration in the body thereby minimizing patient trauma.

TEST TUBE

- K3 EDTA Tube 2&3ml
- Serum Tube (Plain& Clot activator) up to 4ml
- Fluoride Tube 2 ml
- Lithium heparin tube 2 ml
- Sodium heparin tube 2 ml
- Sodium citrate(3.2 %)tube 2 ml (for PT)
- Sodium citrate(3.8 %)tube 2 ml (for ESR)
- Packing : Poly bag / Box / Thermocol Tray

ALCOHOL SWAB

- Alcohol swabs that are saturated with isopropyl alcohol.
- It providing maximum hygiene to the patients.
- This products is extensively used in hospital and is packed by using material that helps in keeping the contents of the products and does not let the alcohol dry.

PREP RAZOR / SKIN BLADE

- Prep Razor/ Skin Blade with Platinum edge blade mainly used by hospitals before operation to remove unwanted hairs from the patient.
- Quality of blade is one of the best available in india.

HIV KIT

- Disposable Gown: 1Pcs
- Surgeon's cap: 1Pcs
- Shoe Cover: 1 Pcs
- Latex Gloves: 1 Pair
- Goggles:1 Pcs
- Face Mask : 1 Pcs
- Sterile/ Disposable/

DISPOSABLE CAP

- Manufactured from soft Non - woven cloth.
- Specially Designed to protect the patient against dropping of hair/ dandruff of the doctor & other attending staff.
- Provided with stitched interlocking adaptable elastic for better grip on the forehead & comfortable fitting.
- Disposable Sterile & Non Sterile.
- Available Bouffant cap and Surgeon's cap.

DISPOSABLE MASK

- Manufactured from soft Non - Woven Cloth.
- Double or triple layer Mask offering excellent bacterial filtration efficiency.
- Super smooth soft ultrasonically welded mask is most comfortable during use.
- Disposable Sterile & Non Sterile.

DISPOSABLE HAND GLOVES

SHOE COVER (PAIR)

TOTAL KNEE REPLACEMENT KIT

- Surgical Gown 5 Pcs
- Helmet Hood 5 Pcs
- Bed Sheets 2 Pcs
- Knee O Drape 1 Pcs
- Cuttrey Pencil 1 Pcs
- Spilit Drape 1 Pcs
- Mayo Trolley cover 1 Pcs

EYE PAD

TOTAL HIP REPLACEMENT KIT

- Surgical Gown 5 Pcs
- Helmet Hood 5 Pcs
- Bed Sheets 2 Pcs
- Hip U Drape 1 Pcs
- Cuttrey Pencil 1 Pcs
- Spilit Drape 1 Pcs
- Mayo Trolley cover 1 Pcs
- Yankauer suction set.
- Spilit Drape 1 Pcs
- Mayo Trolley cover 1 Pcs

CANNULA FIXATOR

- Semi Permeable adhesive dressing B.P.
- Cannula fixer elastic bandage dressing designed to secure the catheter in challenging I.V. application.
- ' U' Shaped design to secure the IV cannula in place.
- Stick well, yet remove easily.

PLASTER OF PARIS BANDAGE

- Plaster of Paris Bandage is widely used in orthopaedic segment for rectifying the bone damages and dislocation.
- These bandages are offered in specific length of 2.7 meter, Further, we supply these products in diverse size and length as per the clients specifications.
- Plaster of paris Bandage have a high cast strength and optimum setting time.

COTTON CREPE BANDAGE

- Manufactured using thick fabric.
- These bandages have several features such as woven fast edges, better elasticity, controlled uniform & smooth pressure.
- These bandages help in allowing normal skin breathing ,as they do not hamper joint and muscular flexibility.
- In order to restore the elasticity of these bandages and enhance their function life one should wash them in warm soapy water, then rinse thoroughly in fresh water of tap, then squeeze them gently and allow them to get dry without much stretching.

ELASTIC ADHESIVE BANDAGE

- Elastic adhesive bandage is a lightweight strapping bandage that can be use for ankle taping knee taping, hand taping and wrist taping. It is applied when moderate to maximum strength is necessary.
- It is a heavy duty elastic adhesive bandage with aggressive adhesion.
- Its soft cotton has very good conform ability.
- Elastic adhesive bandage is strong and reliable stickiness.
- It leaves no residue on body parts.

ADHESIVE TAPE

- Adhesive tapes are manufactured using high grade raw material.
- These tapes are extensively used for diverse commercial and household uses.

ROLLER BANDAGE

- Roller Bandages used in wound dressing.
- These roller bandages are odorless and absorbing moisture in good quality.
- for the convenience of our clients, these roller bandages are individually packed

COMBINE DRESSING

- Manufactured using highly absorbent cotton.
- The non-woven facing & highly absorbent cotton filler having rayon fibers allow liquid to diffuse throughout the combine pad.
- Hydrophobic backing prevents the strike through.

ABSORBENT COTTON WOOL

- Absorbent cotton wool is Fabricated Using 100 % Cotton.
- The absorbent cotton wool is absolutely free from naps, leaf, shell and seeds.
- To ensure the best quality of these wools, they are bleached to a good white and hence offer an excellent absorbency.
